Photos reptiles de Jean-Robert Moronval

A photograph of a Peigne de Vénus (Aster triflorus) plant. The plant features finely divided, feathery green leaves and several small, white, five-petaled flowers arranged in clusters. It is growing in a garden bed with other green plants in the background.

Peigne de Vénus

A photograph of a Chardon Marie (Ficaria verna) plant. The plant has large, deeply lobed leaves with prominent white variegation. The leaves are heavily damaged, with numerous holes and tears. It is growing in a garden bed with other green plants in the background.

Chardon Marie

Ophrys Bourdon

Orchis pyramidal

Bergeronnette printanière

A photograph of two young European Starlings (Sternus vulgaris) perched on a green, leafy plant. The birds have brownish-grey plumage with numerous white spots on their chests and backs. They are facing right, with the bird on the left slightly ahead of the one on the right. The background is a clear, light blue sky.

Jeunes étourneaux sansonnets

A black bird, likely a blackbird or similar species, is perched on a weathered stone wall. The bird has a bright yellow beak and a yellow ring around its eye. It is facing left. The background is a blurred green, suggesting foliage. A blue metal fence post is visible on the left side of the frame.

Merle noir

Pic épeiche

A close-up photograph of a blue tit (Mésange bleue) perched on a tree branch. The bird is facing left, showing its blue cap, white cheeks, and blue and white plumage. The branch is covered in bright green moss. The background is a soft-focus green, suggesting foliage.
